A Member of the KRONES Group

**Integrated
Plastics
Systems AG**
Your systems
integrator for
PET and CAP
Injection
moulding.

We understand that successful CAP and PET preform production requires **perfect interplay between multiple factors**, which is why we focus on the production life cycle as a whole.

Providing you with the most efficient and fully integrated **end-to-end solution**.

Our unique **360-degree approach** to your needs separates us from the crowd. From our expertise in light weighting, to production support, to our on-site mentoring, our approach is one of a kind.

Our Competences

- System Engineering**
 Conducting equipment evaluations, Meeting engineering-specific needs, Modelling your perfect system
- Preform design**
 Preform drawing based on your specifications for your desired bottle. Sales drawing for your customer, Options for lightweight design incl. calculation, Stretch blowing ratio evaluation
- Caps & Closures**
 Caps & Closures drawing based on your specifications for all commonly-used bottle neck finishes, Sales drawing for your customer, Options for material saving, new standards like tethered caps
- Factory design**
 Plant layout, Material flow analysis, Storage solutions

Our Solutions

- Consulting**
 Preform & bottle design, Cap solutions, Factory design, Resource management
- Project Management**
 360° communication & coordination, Full technical support, Documentation
- System Deployment**
 Installation and commissioning, Application and SAT
- Training & Support**
 A wide variety of training options, Production support
- System Lifecycle**
 Efficiency mentoring, Maintenance and service, Spare parts
- Sustainability**
 Energy and waste reduction, light weighting, efficiency
